

AMERICAN PERC-RITE®

AMERICAN-ONSITE CONTROLS

DESIGN RESOURCES

DESIGN SUPPORT FOR CONTROLS & DRIP DISPERSAL

American provides **FREE DESIGN SUPPORT** through web based **Calc Tools**

The Perc-Rite® Drip system features **NEW** competitive DISC filtration, automatic zone dosing, automatic field flushing and flow measurement for long term serviceability.

American provided design support for **CONTROLS** with an Excel spreadsheet, specification and estimating tool. The links are shown below;

PERC-RITE® DRIP SYSTEM & CONTROL DESIGN LINKS

Perc-Rite® Drip System Virginia Calc-Tool

<http://www.americanonsite.com/american/dg-promo1.html>

Go to the American web home page, in the second paragraph click on "Design Guides", scroll down to the Virginia ICON and download the calc tool.

Perc-Rite® Drip System Packaged Alternative Systems

<http://www.americanonsite.com/american/manuals/res-dwg.html>

Go to the American web home page, on the left hand menu, click on "Downloads", Then "Residential Package Systems", scroll down to the package system you wish to use and download the design template.

American Manufacturing will design and build most any onsite wastewater or water system controller that is typically used today. American Manufacturing becomes involved with the entire operation of the system whether potable water, process water, or wastewater. American has on-staff Professional Engineers, designers, soils scientists, and trained sales personnel with state-of-the-art experience in control systems. We provide complete design support for most any Drip Dispersal Application

Our objective is to provide the most practical, economical, and efficient system control devices for fluid handling. We inventory many standard application controls and are able to manufacture special application panels in a very timely manner due to our modular design.
