COMPETITIVE SINGLE FILTER SYSTEM MOST MANAGEABLE SYSTEM FOR TREATED EFFLUENT

Monitor flow and efficiently manage your drip system. This unit allows fast determination of zone flow rates and filter capacity. Manually clean the disc filter in minutes during treatment system maintenance. Available with many Perc-Rite® Drip control panels.

Each Perc-Rite® Drip Dispersal System ordered with the “Wash down” option is integrated based on most accepted standard developed by the National Onsite Wastewater Recycling Association “NOWRA” for Drip Dispersal. The Guidance document is available on many web sites including NOWRA.org and VOWRA.org.

The user friendly “Wash down” option includes a filter unit enclosure, all mounting hardware, and easy-to-follow, step-by-step schematics for installation and total project support by American Manufacturing Company, Inc.

FEATURES:

- FOR USE ON ALL “DP0” SERIES CONTROL PANELS AND TWO ZONE “DP1” SERIES
- USER FRIENDLY DISPLAY PRODUCT
- ADJUSTABLE PUMP RUN TIMERS AND REST TIMER
- ALL CONTROLS HAVE AUDIBLE/VISUAL LEVEL ALARM

American Manufacturing will design and build most any onsite wastewater or water system controller that is typically used today. American Manufacturing becomes involved with the entire operation of the system whether potable water, process water, or wastewater. American has on-staff Professional Engineers, designers, soils scientists, and trained sales personnel with state-of-the-art experience in control systems. We provide complete design support for most any Drip Dispersal Application

Our objective is to provide the most practical, economical, and efficient system control devices for fluid handling. We inventory many standard application controls and are able to manufacture special application panels in a very timely manner due to our modular design.
