AMERICAN AUTOMATED CONTROL— CUSTOM DESIGN

American Manufacturing Company Inc. designs and builds most any integrated onsite wastewater or water system controller that is typically used today. American Manufacturing becomes involved with the entire operation of the system whether potable water, process water, or wastewater. American has on-staff Professional Engineers, designers, soils scientists and trained sales personnel with state-of-the-art experience in control systems. American supports Drip Dispersal custom designs for Perc-Rite® pump and filtration units and Drip Dispersal Systems.

American Manufacturing Company, Inc., 22011 Greenhouse Rd, Elkwood, VA 22718

- *HAS ITS OWN AUDIBLE ALARM TO SIMPLIFY TROUBLESHOOTING*
- *4 CHANNEL FAILURE INDICATOR W/REMOTE ALARMING*
- *DATA LOGGING & ACQUISITION*
- *COMBINATION CONTROL FOR PRETREATMENT*

HMI Interface

The HMI (Human Machine Interface) contains all graphical and other interface information. The control system is an interactive visual representation of what is taking place from the control panels' point of view at the current time.

General Window

The general window appears when your HMI boots. It is always active and gives the operator a significant amount of control as well as showing the status of the system in real-time. Most things on this menu are interactive and some have sub menus. The TOUCH SCREEN takes you through all of the visual displays, functions, and controls available to the operator.
